HUD Releases Updated NSP Data Clean-Up Reports

In December 2019, HUD's Office of Block Grant Assistance (OBGA) Neighborhood Stabilization Program (NSP) team released NSP Data Clean-Up **Financial** and **Performance** Reports in the Disaster Recovery Grant Reporting System (DRGR) Reports Module, MicroStrategy.

Based on user feedback and report testing, HUD has developed a new version of the Performance Report and guidance for grantees to make corrections in DRGR.

The Performance Report has a revised layout using three tabs, has renumbered and renamed report criteria, and has revised report flag labels. Report objects have been revised to correct reporting errors. To make the presentation more compact, fewer performance measures are presented within the report and the number of columns in each tab has been reduced. Please see the NSP Data Clean-Up Performance Report Version 2.1 Release Notes for more information.
View instructions on accessing the reports, the revised guidance, and the revised report fact sheet on the NSP Data Clean-Up Reports page.

Questions?

Please see the "Prepare" section of the NSP Closeout Process and Guidance for resources on preparing for closeout and making corrections in DRGR.

If you have comments or questions about using the NSP Data Clean-Up Reports, please email DRGRteam@cloudburstgroup.com.

If you are having trouble accessing DRGR or accessing the MicroStrategy reporting module, please submit a question through the HUD Exchange Ask A Question (AAQ) portal. Under "My question is related to," select "DRGR: Disaster Recovery Grant Reporting System."
