# What is a Sector Strategy?

---

A sector strategy is a partnership of multiple employers within a critical industry that brings together education, economic development, workforce systems, and community organizations to identify and collaboratively meet the workforce needs of that industry within a regional labor market.

# How Does it Affect What a Workforce Organization Does?

Sector strategies represent a new way for workforce organizations to conduct business: moving from a “program administration” focus to a more strategic role building regional talent pipelines, addressing skill gaps, and creating meaningful career pathways for a range of workers in important regional industries.
